Procedural Writing - Grade Three

Saskatchewan School Library Association
Procedural Writing

Instructions, rules and procedures aim to ensure something is performed correctly and a successful outcome is achieved. The process is given in the order in which it needs to be undertaken to achieve a successful outcome - usually a series of sequenced steps. Like all text types, variants of instructions can occur (i.e., pictorial rather than text based) and can be combined with other text types.

There are different procedural texts for different purposes:

- Texts that explain how something works or how to use instruction/operation manuals, for example, how to use the video, the computer, the photocopier.
- Texts that instruct how to do a particular activity, for example, recipes, rules for games, science experiments, road safety rules.
- Texts that deal with human behaviour, for example, how to live happily, how to succeed.

Understanding The Genre

- Understand lists are a functional way to organize information
- Understand that the form of a list or procedure is usually one item under another and it may be numbered
- Understand procedural writing (how-to) as a list of directions for how to do something and a list of what is needed
- Learn how to craft procedural writing from mentor texts

Writing In the Genre

- Make lists in the appropriate form with one item under another
- Use lists to plan activities or support memory
- Use a list to inform writing
- Use number words or transition words
- Make lists with items that are appropriate to the purpose of the list
- Write procedural or how-to books with pictures to illustrate steps
- Write steps of a procedure with appropriate sequence and explicitness

Fountas and Pinnell

Instruction

Generic Text Structure:

- Goal - a statement of what is to be achieved, i.e. How to make a sponge cake
- Materials/equipment needed, listed in order, i.e. 2 eggs, flour
- Sequenced steps to achieve the goal, i.e. Cream the sugar and butter.
- Often diagrams or illustrations

Language Features:

- Written in the imperative, i.e. Sift the flour or 2nd person i.e. first you put ...
- In chronological order, i.e. First, next
- Use of numbers, alphabet or bullet points and colour to signal order
- Use of adverbs and adjectives for precision - i.e. measure carefully

| **Tasks:**  
• Read Procedural Mentor Text: *Growing Vegetable Soup (Ehlert)* to display pictures which show process and demonstrate final outcome  
• Create anchor chart of text features which could help clarify the procedure for the reader, such as bold words, captions, arrows and action lines, extra information in parenthesis, and close-up or zoom in pictures | **Tasks:**  
• Demonstrate SnapGuide and view recipes and other DIY projects  
• Have students type their procedure and materials list on SnapGuide. It is recommended having a teacher account and providing students with the password.  
• Snap photos or pictures of student illustrations detailing each step of the process. It is recommended that the pictures be saved in a folder prior to typing procedure. | **Tasks:**  
• Celebrate with a publishing party.  
• Bring cookies and juice.  
• Have students take turns displaying their stories |

Day Twelve - Fourteen- SnapGuide

SnapGuide is a free iOS app and web service which hosts how-to guides on varying subjects, and allows students to create their own guides to share. Snapguide provides easy to understand instructions for a wide array of topics including cooking, gardening, crafts, repairs, do-it-yourself projects, fashion tips, entertaining and more. Students can search for step-by-step guides on anything, or browse the four general categories: topics, featured, popular, and recent guides.

Each guide has clear pictures to provide guidance through a project or recipe. Snapguide lets students see what each step of the project is to look like in the process. Each guide follows a step-by-step process that is easily navigated by swiping left to advance and right to go back. Steps in a guide can include videos, photos or plain text depending on the complexity of what is being taught.

In addition to searching for and saving guides, students can also create a procedural text to share on SnapGuide. Simply upload pics and enter the accompanying steps, type the ingredient or material list, and publish. Students can interact with others about the recipe or project.
